nishanegi16112001@gmail.com | (+91) 8209244972 | [Linkedin](#) | [Portfolio](#) | [Leetcode](#) | [Github](#)

Skills

Languages: C++, JavaScript, Python, SQL

Technologies & Tools: ReactJS, Express, NodeJS, Rest API, Flask, MongoDB, AWS-S3/EC2/Lambda, Git, Kafka

Technical Experience

Software Engineer, Estrel AI- Hyderabad, Telangana

Nov 2024 – Present

- **Product Development:** Core frontend engineer for WiiZ Atlas, a no-code Agentic AI orchestration platform. Contributed to successful product launch enabling users to build and deploy AI agents without coding.
- **Workflow Builder Development:** Built the drag-and-drop workflow editor using React.js, React Flow, and Tailwind CSS. Developed visual workflow design, pre-built templates, node-based components, and real-time validation for complex AI agent orchestration.
- **Integration Features:** Integrated 15+ services including Outlook, Gmail, MCP tools, vector databases (Milvus, Pinecone), and LLM providers (OpenAI, BytePlus, Groq). Implemented user management with RBAC, workflow scheduling, execution tracking, OAuth 2.0 flows, and RESTful API integration.
- **Backend Development:** Architected Python Flask microservices for a route optimization product. Designed asynchronous API endpoints using threading for long-running tasks (5-10+ min), improving responsiveness. Technologies: React.js, Tailwind CSS, JavaScript, Python (Flask), PostgreSQL, MySQL, RESTful APIs, JWT, OAuth 2.0, AWS (S3, EC2, Lambda).

Software Developer Trainee, Nupeak IT Solutions Pvt Ltd – Ahemdabad

Feb 2024 – Aug 2024

- Engaged in pharmaceutical and public sector projects, gaining hands-on experience applying frontend, backend, databases, SAS tools and methodologies within the industry.
- Developed 10+ dynamic dashboards in SAS VA, improving data visualization and insights for key stakeholders.

Projects

StudyNotion: MERN Stack-Based Ed-Tech Platform

[Live link](#)

- Fully functional ed-tech platform allows users to create, consume, and rate educational content, while enabling instructors to showcase their expertise globally
- Key features include: User authentication with OTP and JWT for security. Razorpay integration.
- Tools Used: ReactJS, Tailwind CSS, Redux, Node.js, Express.js, MongoDB, JWT, Bcrypt, Mongoose, Razorpay, Cloudinary

RestBox - A Full-Stack API Client

[Live Link](#)

- Engineered a unique cURL command parser using TypeScript and Regular Expressions, enabling instant request setup from a single paste and significantly improving the developer workflow.
- Including a persistent request history saved to localStorage for a seamless and stateful user experience.
- Tools Used: React, TypeScript, Node.js, Express.js, Tailwind CSS, react-syntax-highlighter, lucide-react, tailwind-scrollbar

Achievements

SAS Innovate Tour Recognition: Selected for the "SAS Innovate Tour 2024 " in Mumbai for our generative AI project.

Won Nureka Hackathon 2024: Showcasing innovative problem-solving skills for Golden Batch Solution.

Second Prize, Innovative Design Project: Awarded 2nd prize for a Whatsapp Chat Analyzer project out of 100 entries.

Education

Poornima University, Jaipur ,M.C.A

Aug 2022 – Apr 2024

- CGPA: 8.31/10

Kanoria PG College, Jaipur (Rajasthan University) ,B.C.A

Apr 2019 – June 2022

- Percentage: 75/100

Kendriya Vidyalaya No. 3, Jaipur

Apr 2017 – Mar 2019

- 12th Commerce CBSE - Percentage: 80/100

- 10th CBSE - CGPA: 9.2/10
